

Jacob Anderson

Patent Technical Specialist | Computer Engineer

Atlanta Metropolitan Area | 404-626-0025 | jacob@jacobdanderson.net | jacobdanderson.net | linkedin.com/in/jacoba1100254352

Patent Technical Specialist at Meunier Carlin & Curfman LLC and M.S. Computer Engineering candidate with experience analyzing inventions, preparing patent application materials, researching technical and patent issues, and translating complex systems into clear written and visual explanations. Engineering background includes embedded systems, sensing, simulation, communications, software, and product work.

PATENT EXPERIENCE

Patent Technical Specialist
Meunier Carlin & Curfman LLC, Atlanta Metropolitan Area

Aug 2026 - Present

- Analyze invention disclosures and inventor discussions involving electrical, computer, biomedical, and related technologies.
- Assist with claims, technical descriptions, figures, application strategy, and technical and patent-related research under attorney supervision.
- Continued with the firm after serving as a Summer Intern from June through August 2026.

TECHNICAL RESEARCH AND ENGINEERING

Programmer and Technical Operations
AudioT

May-Aug 2020; Mar 2026-Present

- Program Raspberry Pi systems in Python and Bash and document sensor-data collection for prototype iteration.
- Configure Debian-based infrastructure for remote audio ingest, deployment tooling, and field-readiness validation.

Undergraduate Researcher
Brigham Young University

Sep 2022 - Oct 2024

- Integrated sensing hardware for a non-invasive glucose-monitoring prototype and supported multidisciplinary lab testing.
- Built MATLAB and Python workflows for signal processing, calibration, data analysis, and design refinement.

IMMERSE Summer Researcher
Purdue SCALE x Brigham Young University

Summer 2024

- Implemented Xschem and Ngspice workflows for the OSCRE radiation-effects simulation framework.
- Documented repeatable setup and analysis workflows and co-authored the resulting ISCAS 2025 paper.

PRODUCT, INSTRUCTION, AND LEADERSHIP

Co-Founder and CTO
Stride

Sep 2025 - Aug 2026

- Directed prototype architecture for a rental-based backcountry search-and-rescue device concept with location and alert workflows.

Private Youth STEM Instructor
Classes with Jacob | Prior Instructor and Trainer, Juni Learning, Jun 2021 - Nov 2025

Sep 2025 - Present

- Adapt programming, math, science, and Spanish instruction for learners with varied goals and experience levels.

EDUCATION

M.S. Computer Engineering
Georgia Institute of Technology
Graduate GPA: 3.50 through Spring 2026

Expected May 2027

B.S. Computer Engineering
Brigham Young University | Minor in Computer Science
Cumulative GPA: 3.79

Apr 2025

PUBLICATION AND TECHNICAL SKILLS

Publication: Co-author, "Open-Source Circuit Radiation Effects (OSCRE) Simulation Framework: Design and Applications," IEEE ISCAS 2025. DOI: 10.1109/ISCAS56072.2025.11043386

Programming: Python, C, C++, MATLAB, TypeScript, Java, Bash, SystemVerilog, Verilog, VHDL

Systems and tools: Linux, Git, Raspberry Pi, Xschem, Ngspice, embedded systems, communications, signal analysis

Patent-related work is performed through Meunier Carlin & Curfman under attorney supervision.
